

Pilot Workshop on Arrangements for the Termination of a Nuclear or Radiological Emergency

Ref. No.: J3-TR-55459

Prospectus

Title:	Pilot Workshop on Arrangements for the Termination of a Nuclear or Radiological Emergency
Dates:	18–21 December 2017
Place:	Vienna, Austria
Deadline for Designations:	2 October 2017
Language:	English
Organizer:	International Atomic Energy Agency (IAEA)
Background Information	<p>The Safety Requirements publication <i>Preparedness and Response for a Nuclear or Radiological Emergency</i> (IAEA Safety Standards Series No. GSR Part 7) requires governments to ensure that arrangements are made for the termination of a nuclear or radiological emergency, taking into account the need for a resumption of social and economic activity. Past experience has shown that most Member States pay particular attention to ensuring adequate preparedness to respond early and effectively to a nuclear or radiological emergency in order to protect human life, health, property and the environment. However, less attention has been devoted in the past, at the preparedness stage, to practical arrangements for dealing with the challenges associated with the termination of a nuclear or radiological emergency and the transition to the new normality, which may involve a long term recovery process.</p>
Purpose of the Workshop:	<p>The purpose of this workshop is to raise awareness among personnel of relevant organizations at the national, regional and local levels and to train them on (a) how to prepare for facilitating smooth and prompt resumption of social and economic activity after a nuclear or radiological emergency; and (b) what steps they need to take so that the nuclear or radiological emergency can be declared formally ended and the transition to either an existing exposure situation or a planned exposure situation can take place.</p>

As part of the workshop the following aspects will be addressed in detail:

- The prerequisites that need to be fulfilled to enable the termination of the emergency and subsequent transition to either an existing exposure situation or a planned exposure situation;
- The differences between transitioning to either an existing exposure situation or to a planned exposure situation;
- Responsibilities and management organization;
- Protection strategy for the transition phase;
- Adapting and lifting protective actions;
- Characterization of exposure situation;
- Medical follow-up and provision of mental health and psychosocial support;
- Radioactive waste management;
- Protection of emergency workers and helpers during the transition phase;
- Involvement of, and consultation with, relevant interested parties; and
- Infrastructural elements necessary to support adequate capability for response during the transition phase.

During the workshop, retrospective analysis of representative past emergencies will also be given covering the above-mentioned aspects.

The workshop will not cover aspects related to long term recovery and remediation following a nuclear or radiological emergency.

**Participants’
Qualifications and
Experience:**

The main target audience is participants from organizations with responsibilities in preparing for, and responding to, a nuclear or radiological emergency at the national, regional, or local level, as well as at the facility level, with regard to the later phases of a nuclear or radiological emergency. Participants from other organizations responsible for various aspects of the recovery efforts during the transition from the emergency exposure situation to either an existing exposure situation or to a planned exposure situation are also welcome to attend the workshop.

The actual work that prospective participants perform, as well as relevant background activities in their home countries, will be considered in the selection process. As the workshop will be conducted in English, participants should have sufficient proficiency to follow lectures and express themselves in that language without difficulty.

The workshop is limited to 25 participants to allow for active discussions and effective working sessions.

**Nature of the
Workshop:**

The workshop programme will consist of a combination of lectures and working sessions. The workshop agenda will be sent to designated participants in due course.

DESIGNATION FOR TRAINING EVENT

Note 1: A copy of the passport must be attached to this form.

Note 2: This training event is being implemented under the coordination of the Incident and Emergency Centre. The Permanent Mission should be used as the official channel for submission of the designation.

The Government of	designates the following candidate for
Title of the training event: Pilot Workshop on Arrangements for the Termination of a Nuclear or Radiological Emergency	Reference: J3-TR-55459
Place: Vienna, Austria	Dates: 18–21 December 2017

CANDIDATE INFORMATION

Personal details:	Complete mailing address (office):
Date of birth:	Inst. Name:
Place of birth:	Street:
Family name:	PO Box:
First name:	Post Code:
Nationality:	Town/City:
Passport No.:	Region/District:
Date of issue:	Country:
Valid until:	Telephone:
Mobile phone:	Email:
Email:	
Airport/town nearest to residence:	Emergency phone number :

EDUCATION (list the education of the candidate which is relevant to this training event)

Years attended		Name and place of institution	Field of study	Diploma or degree
from	to			

RECENT EMPLOYMENT RECORD (List the candidate's employment history which is relevant to the training event, commencing with current employer)

Years of service		Name and place of employer/organization	Title of position	Type of work
from	to			

DESCRIPTION OF WORK

Type of work done by the candidate during the past three years:

SURVEILLANCE PROGRAMME (fill this field only if the applicable option is pre-marked)

Applicable **No applicable**

Is the candidate covered under a radiation surveillance programme in his/her home country?

- ☐ Yes. If yes indicate the integrated dose during the last five years: mSv. Service provided by
- ☐ No

PREVIOUS PARTICIPATION IN AN IAEA ACTIVITY:				
Has the candidate participated in a previous IAEA activity related to emergency preparedness and response (EPR)? If yes, please list each activity below:				
Event	Date	Place	Remarks	
LANGUAGE PROFICIENCY:				
(a) Mother tongue of the candidate:				
(b) Other languages:				
(c) Language of the training event:		English		
	Read	Write	Speak	Understand
Proficiency in the language of the training event	<input type="checkbox"/> Good	<input type="checkbox"/> Good	<input type="checkbox"/> Good	<input type="checkbox"/> Good
	<input type="checkbox"/> Average	<input type="checkbox"/> Average	<input type="checkbox"/> Average	<input type="checkbox"/> Average

GOVERNMENT SECTION				
RELEVANCE OF THE TRAINING				
Explain why the candidate is suited to receive this training:				
TRAINING SPECIFIC RESULTS				
Summarize how the Government intends to build on this training to promote enhancement of EPR in the State (e.g. conduct similar national training events):				
FINANCIAL SUPPORT				
Is the Government requesting financial support for the participation of the designated candidate?				
<input type="checkbox"/> Yes (Approval subject to availability of funds) <input type="checkbox"/> No				
GOVERNMENT PRIORITY				
If the Government is designating more than one candidate, indicate the priority that should be given to this candidate:				
One <input type="checkbox"/> Two <input type="checkbox"/> Three <input type="checkbox"/>				
(The IAEA Secretariat will consider this prioritization, but reserves the right to select the most suitable candidate considering the information provided alongside this form)				
GOVERNMENT STATEMENT				
The designating Government gives the following assurances:				
a) All information supplied in this form is complete and correct; b) It is noted that the sponsoring organization(s), host country(ies) and host institution(s) do not accept liability for the payment of any costs or compensation arising from damage to or loss of personal property, or from illness, injury, disability or death of a participant while he/she is travelling to and from or attending the training event, and it, the designating Government, undertakes the responsibility for such coverage; c) The position of the candidate will be retained for him/her and he/she will continue to receive during the training event a salary and related emoluments to enable him/her to meet his/her financial commitments in his/her home country; d) If selected, the designee will conduct himself/herself in a manner compatible with his/her status as a participant and will refrain from engaging in any political and commercial activities; e) No facts are known to the Government regarding the reliability and character of the applicant which would obstruct giving him/her access to nuclear installations or institutions where ionizing radiation is used.
